BI - MATERIAL

The new variable thickness footpocket provides the best of both worlds. The thicker "X" areas of the footpocket are designed to transmit the energy produced from the leg into the blade with zero dispersion and loss of energy.

The footpocket is constructed of a soft material ensuring maximum comfort and fit.

The lateral side ribs have been shortened to a minimum, exploiting the best of the elastic and mechanical properties of the blade.

Sizing of the foot-pocket is measured on actual barefoot size, including a smaller range for more fitting options.

The new X-WING foot-pocket is among the lightest in the market and designed to exploit our new 30-degree incline blade, resulting in pure comfort and maximum thrust / performance.

MAIN FEATURES / FINS

MANUFACTURING PROCESS

Composite fin blades are manufactured in a high-pressure press, reaching 15kg/cm². This process allows for precise control of the amount of resin in the product with 100% accuracy and reliability.

Each blade is independently milled by CNC and the folding process is completed using an exclusive thermo-forming system with a controlled tempering of the material.

This system delivers consistency and unbeatable durability, particularly in the flexion area of the blade.

The Fiberglass blades are constructed of a material impregnated with a proprietary-formulated resin, making it especially responsive, lightweight, and high-performance. The carbon and fiberglass blended blades are compressed in a unique layering process that achieves maximum performance while reducing muscle fatigue over periods of extended use.

The new carbon blades are manufactured using a combination of varying lengths in the carbon and fiberglass layers, all of it finished with G10 resin. The new carbon used is 3k with crossed fibers woven at 90°.

Two types of blades are made in variable thickness, which facilitates high-performance parabolic curvature.

BLADE GEOMETRY

Double Wave Flex

The new freediving and deeper spearfishing blades have an optimal 30-degree angle of attack. This creates a natural extension of the leg, so that the forward thrust has the same amplitude as the return kick. Additionally, the length, width and layering of materials make it possible to achieve a double undulating stroke resulting in continuous thrust.

POLYGON

mares

The latest research regarding fish vision shows that they are capable of seeing ultraviolet rays which are invisible to the human eye. Contrasting colors are also more visible to them. We can obtain the best camouflage by reducing the contrast between colors with a polygonal design that changes with distance, but the most innovative feature of this material is its ultraviolet absorption.

UV light is especially dominant on cloudy or grey days, and makes fluorescent materials brighter. The least reflective, UV ray absorbing color is INDIGO, the base for our new camouflage.

• COLOR CONTRAST REDUCTION WITH DISTANCE

• UV COLOR ABSORPTION AS PERCEIVED BY FISH

- THE 28MM DIAMETER CIRCULAR BARREL IS CONSTRUCTED OF ANTI-CORROSIVE EXTRUDED ALUMINUM WITH A LOW FRICTION INTEGRATED SHAFT GUIDE
- OPEN MUZZLE CONFIGURATION WITH A FRICTION REDUCTION SYSTEM BETWEEN THE SLINGS AND THE BARREL
- THE MUZZLE ACCOMMODATES TWO 14MM CIRCULAR SLINGS
- A SIMPLIFIED AND OPEN LINE OF SIGHT INCREASES PRECISION AND INSTINCTIVE SHOOTING
- LINE RETAINERS ON THE MUZZLE AND HANDLE ARE LOW PROFILE WITH A CLEAN, SIMPLE DESIGN
- LINE RELEASE MECHANISM IS CONSTRUCTED IN STAINLESS STEEL AND OPTIMIZED FOR LOADING WITH THICKER BANDS
- TRIGGER IS DESIGNED IN A GEOMETRIC SHAPE FOR DYNAMIC SHOOTING
- LATEX CIRCULAR SLINGS COME IN A NEW INDIGO COLOR, MINIMIZING THE REFLECTION OF UV RAYS VISIBLE TO FISH
- DYNEEMA WISHBONE
- 7MM TAHITIAN SHAFT IN 17-4 PH TEMPERED STEEL
- 80MM HORIZONTAL REEL WITH A MICROMETRIC ADJUSTMENT CLUTCH AND 50 METERS OF 1.7MM DIAMETER LINE
- NEW ERGONOMIC HANDLE IN A NON-SLIP GEOMETRIC SHAPE. THE ANGLE OF THE HANDLE IN RESPECT TO THE BARREL IS DESIGNED FOR CONTINUITY WITH THE SHOOTERS ARM, ABSORBING RECOIL
- WIDE SHOOTING LINE-RETAINER CAN BE POSITIONED ON EITHER RIGHT OR LEFT SIDE
- RETRACTABLE SLIDING SAFETY MECHANISM
- REEL HOUSING WITH INSERT ACCOMMODATES USE WITH ROLLER MUZZLES

SLING GUN TEST

Mares products undergo rigorous testing to ensure superior quality and performance. Metal objects are inserted into machines simulating various environmental exposures, including cycles of saline mist. This helps us choose the best materials to prevent oxide formation and environmental degradation.

The slings on the gun, including the shooting line, and shaft fins, are put through traction tests using a machine that illustrates power imparted and deformation based upon kilos of thrust delivered.

The trigger mechanism for sling spearguns is designed using a test bench device. This machine evaluates kilos of pressure for pulling the trigger in relation to the load on the shaft. This is simulated with different slings loaded simultaneously while giving a precise reading of the trigger performance.

SEMINARS 2022

THE MARES LAB SERVICE TECHNICIAN TRAINING PROGRAM

Mares Service Technician Training Courses are available throughout the world and are designed and developed based on proven effective instructional system design principals. They are the dive industry's first and only competency based service technician training courses offered worldwide that are produced and conducted by a major dive equipment manufacturer. This means you'll receive the same high quality and educationally valid training regardless of where in the world you participate in a Mares Service Technician Training Course.

BASIC SERVICE TECHNICIAN DIGITAL LEARNING COURSE

This highly interactive online digital learning course is delivered to the learner using the latest Educational Management System (EMS) technology. The EMS platform technology along with extensive use of video and graphic content enhances learning and retention of information and produces a highly enjoyable educational experience. The course is open to anyone, and can be accessed by contacting the local Mares Subsidiary or Distributor. Take this course as the first step to becoming a fully qualified Mares Service Technician, or if you simply want to learn the basics of regulator design and service and/or repair. This course is a prerequisite requirement for most Mares Lab Skill Based Training Courses. Completion of this course does not qualify you to service or repair Mares equipment.

The course goals are to:

1. Establish your basic knowledge level relating to regulator service and repair procedures.
2. Provide you with basic information about regulator design and function.
3. Provide you with Mares specific information relating to service and repair procedures, manufacturing processes and product information.
4. Help prepare you for success in one or more Mares Lab Skill Based Training Courses.

Prerequisite Requirements:

Course is open to anyone.

MARES LAB SKILL BASED TRAINING COURSES

- MARES SERVICE TECHNICIAN
- MARES DIVING CENTER SERVICE TECHNICIAN
- MARES SPECIALTY SERVICE TECHNICIAN

After successfully completing the Basic Service Technician Digital Learning Course, you are now ready to progress to the skill based training phase of becoming a qualified Mares Service Technician. These courses are conducted by qualified Mares Lab Instructors and consist of comprehensive hands-on training exercises. During these courses you will have the opportunity to perform multiple service procedures on a wide variety of Mares products, including multiple complete regulator service overhauls on various Mares regulators. You'll also gain valuable experience in using the Mares Service Manual and Spare Parts Catalog during routine and special service procedures. Skill based training courses are designed to:

1. Provide comprehensive, real world, hands-on training about how to service and repair Mares products.
2. Enhance the knowledge gained from the Basic Service Technician Digital Learning Course.
3. Develop skills and abilities to the level required to successfully perform service and repair procedures on Mares products.
4. Prepare you for a successful full or part-time career as a Mares Service Technician.

SEMINARS 2022

• MARES SERVICE TECHNICIAN

This is by far the most popular of the skill based training courses. The all new and redesigned Mares Service Technician Training Course is a comprehensive 2 day training program that trains and qualifies individuals to service and repair Mares products. Topics include disassembly, reassembly and adjustment of in-line Mares regulators, service and repair procedures, troubleshooting, dive computers, Mares warranty, service guidelines and more. More than 12 hours of course time is dedicated to hands-on, skill based training on how to properly disassemble, reassemble and adjust Mares regulators and BC inflator mechanisms. **Successful completion of this course qualifies you to service and/or repair ALL Mares products.**

Prerequisite Requirements:

Completion of the Basic Service Technician Digital Learning Course.
Be currently affiliated with an Authorized Mares Dealer.
Be approved by the affiliated Mares Dealer to attend the course.

• MARES DIVING CENTER SERVICE TECHNICIAN

This course is designed for technicians who plan to work in a Mares Diving Center, such as a resort or diver training facility, that has limited or no retail sale of Mares equipment. Course duration is 1 day and provides skill based training related to the Mares Diving Center product line. Take this course if you plan to work in a Mares Diving Center and are interested in being able to service and repair your affiliated Mares Diving Center owned Mares products. **Successful completion of the Diving Center Service Technician Course qualifies you to service and repair ONLY your affiliated Diving Center OWNED equipment used in rental and/or training programs.**

Prerequisite Requirements:

Completion of the Basic Service Technician Digital Learning Course.
Be affiliated with an Authorized Mares Diving Center.
Be approved by the affiliated Mares Diving Center to attend the course.

• MARES SPECIALTY SERVICE TECHNICIAN

These courses are designed to train technicians to service and repair specific Mares products. Specialty Service Technician Training Course duration is approximately 1 day, depending on the course requirements and the number of products included in the course. **Successful completion of this course qualifies you to service and/or repair ONLY the specific Mares products for which you were trained.** These products will be listed on your qualification certificate. Contact your local Mares Subsidiary or Distributor for additional information on Specialty Service Technician Training Courses available in your area.

Prerequisite Requirements:

This varies according to the specific Specialty Service Technician Training Course requirements.
Authorization by a current Mares Dive Center or Mares Dealer.

• MARES SERVICE TECHNICIAN UPDATE

In order to maintain your Mares Service Technician qualification, you must attend the Annual Service Technician Online Renewal within one (1) year* of completing a Service Technician Training Course. Annual Service Technician Online Renewals are available online and are conducted regularly every year from October 15th to December 15th.

* Within one (1) year is defined as before December 31st of the year in which the one year limit is reached.

Prerequisite Requirements:

Currently qualified as a Mares Lab Service Technician.
Qualification date is within the one (1) year update requirement.

THE MARES LAB TRAINING CYCLE®

The Mares Lab Training Cycle is a process that has proven effective in producing what we call "best in class results". This means that as a qualified Mares Service Technician, you can be confident that you've successfully completed the dive industry's most comprehensive dive equipment service and repair training program available through a dive equipment manufacturer. You can also be proud of the fact that you earned your qualification by demonstrating a "best in class" level of dive equipment service technician skills and abilities. Here's how the Mares Lab Training Cycle works:

Your Knowledge Development

Your basic dive equipment service and repair knowledge is established during your digital learning course and further enhanced during your skill based training course.

Your Skill Development

Your service and repair skills are enhanced during your skill based training course through a series of hands-on training exercises. Over 90% of the contact hours in these courses are dedicated to skill development.

Your Abilities Confirmed

Your knowledge and skill levels achieved through the Mares Lab training process are objectively evaluated and must meet the minimum core competency requirements in order to be qualified as a Mares Service Technician.

Your Abilities Improved

Your abilities improve over time by gaining additional knowledge and increasing skill levels. This is achieved through experience as a Mares Service Technician, by regular contact and communication with Mares Technical Assistance staff, by receiving periodic product updates and Service Bulletins and by participating in Service Technician Update Seminars.
