HEAD SWIMMING - RACING Visoka performansa odece uzima u obzir nivo kompresije koja je potrebna da se poveća protok kiseonika u aktivnim mišićima prilikom pokreta. Ova vrsta materijala poboljšava cirkulaciju i dobija više kiseonika u vašim aktivnim mišićima povećavajući njihovu snagu, brzinu i izdržljivost. Poboljšana cirkulacija također pomaže da se eliminiše mlečna kiselina koja se stvara kao i drugi metabolički "otpad" koji se stvara tokom intenzivnog treninga.
