BUYERS GUIDE

mares

COMPANY PRESENTATION

MARES - OVER SEVEN DECADES OF DIVING EXCELLENCE

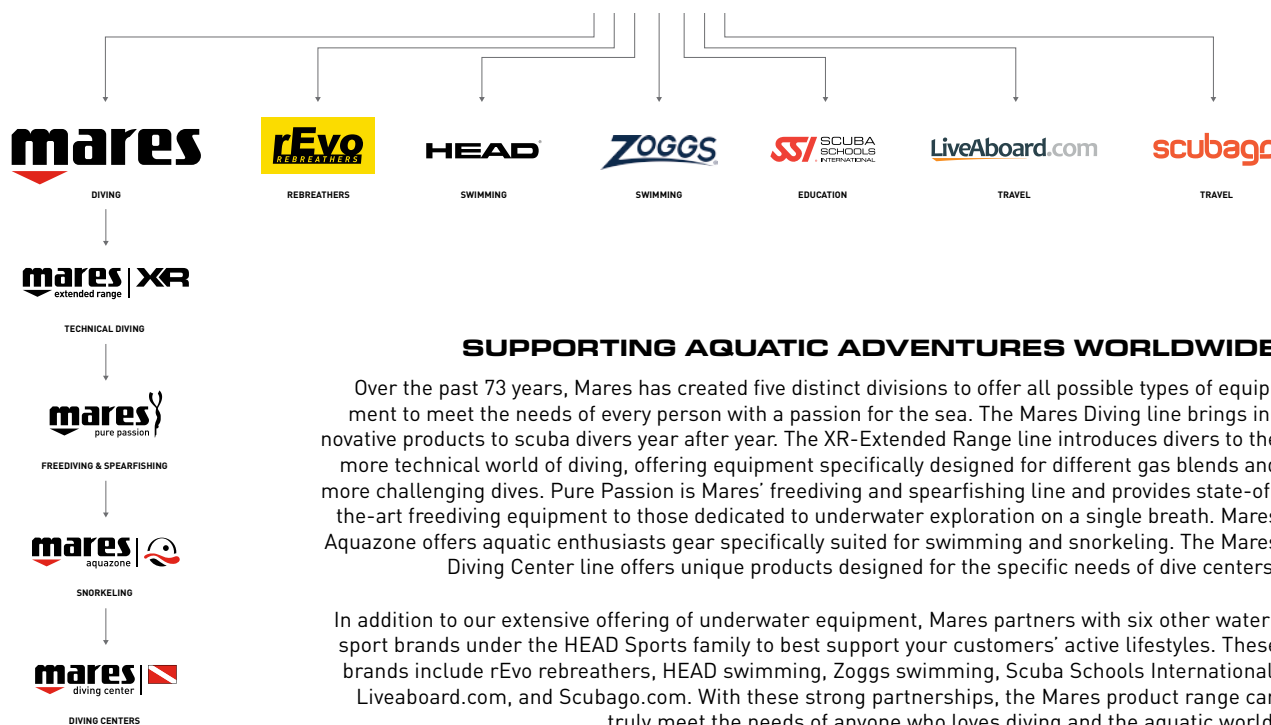

Since 1949 Mares has been a world leader in the manufacturing and global distribution of dive products. A strong athlete and WWI Austrian Royal Navy diver, Ludovico Mares founded Mares through his desire to share his extreme passion for the sea with the rest of the world. From a few spearguns, masks, and fins, Mares grew of humble beginnings into the world's leading dive equipment manufacturer. This passion still drives the spirit of Mares on the relentless quest for innovation, reliability, the best technology, and state-of-the-art performance.

Every year, Mares stays true to its Mission Statement to help every diver:

"ENJOY DIVING WITH ADVANCED PERFORMANCE THROUGH SUPERIOR TECHNOLOGY."

Based in Rapallo, Italy, Mares employees gain daily inspiration from the majestic Mediterranean Sea. The strategic location in this picturesque town on the Italian Riviera allows the Mares product development team quick access to great diving, where they fine-tune every new product to meet the needs of each and every diver. Constant investment in innovation and continuous advanced research makes Mares the leader in safe and reliable underwater equipment manufacturing.

WATERSPORT BRANDS

SUPPORTING AQUATIC ADVENTURES WORLDWIDE

Over the past 73 years, Mares has created five distinct divisions to offer all possible types of equipment to meet the needs of every person with a passion for the sea. The Mares Diving line brings innovative products to scuba divers year after year. The XR-Extended Range line introduces divers to the more technical world of diving, offering equipment specifically designed for different gas blends and more challenging dives. Pure Passion is Mares' freediving and spearfishing line and provides state-of-the-art freediving equipment to those dedicated to underwater exploration on a single breath. Mares Aquazone offers aquatic enthusiasts gear specifically suited for swimming and snorkeling. The Mares Diving Center line offers unique products designed for the specific needs of dive centers.

In addition to our extensive offering of underwater equipment, Mares partners with six other watersport brands under the HEAD Sports family to best support your customers' active lifestyles. These brands include rEvo rebreathers, HEAD swimming, Zoggs swimming, Scuba Schools International, Liveaboard.com, and Scubago.com. With these strong partnerships, the Mares product range can truly meet the needs of anyone who loves diving and the aquatic world.

INTERNET POLICY

POLICY FOR THE DISTRIBUTION OF MARES PRODUCTS OVER THE INTERNET

In recent years, distribution over the internet has increasingly become an additional means of distribution besides traditional stationary trade. In particular, internet distribution offers new possibilities to dealers of MARES to sell to the final customer.

Even though MARES considers stationary sport retailing as an indispensable means of distribution with a view to providing information and advice to the final customer, MARES also welcomes the increasing use of the internet as a parallel channel of distribution, as additional selling opportunities are in the interest both of the manufacturer and of the dealer and increase overall market coverage.

However, MARES as manufacturer is responsible to ensure, together with its dealers, that the specificities of the internet distribution are taken into account as the final customer has no opportunity to inspect the products and to assess their suitability for use in sport. Thus, in light of the potential risks which are connected to the use in sport of the sold products, MARES and its dealers have to ensure that the distribution over the internet does not give rise to any detriment or risk to the final customer and that customer dissatisfaction based on wrong expectations of the product characteristics due to incomplete or wrong information is avoided.

For this reason, MARES has established the following guidelines, which cover the distribution of MARES products over the internet to final customers by all dealers.

For purposes of these guidelines, MARES products are all products distributed by MARES. The dealer commits not to sell MARES products over the internet outside the EU.

The way of presentation of the sold products over the internet shall ensure that all essential characteristics, features and parts of the product are truthfully displayed, and allow the final customer to assess the suitability of the product with a view to his sporting skill, as well as any dangers and risks connected to the envisaged use in sport. With a view to this, the dealer shall implement appropriate technical and design solutions for the presentation of the products, and include for each product a link at a clearly visible location to the respective product description on www.mares.com, to allow the final customer to access further information and technical data on the respective MARES products.

For consumer safety, warranty and product liability reasons and to avoid any possible confusion, dealer shall only advertise and sell new and unused MARES products in their original packaging and with the appropriate user manual enclosed.

With a view to the technical nature of the products, the dealer shall ensure that telephone support is available to final customers in case of distribution over the internet. Support shall be provided by qualified personnel during normal trading hours to a sufficient extent under a local number and the language of the respective country of distribution. The telephone support shall offset, in particular, the missing opportunity for the final customer to assess the product characteristics, and shall ensure that the use of the MARES product will not give rise to any detriment or risk to the final customer due to insufficient advice. The dealer commits to provide the qualified personnel with regular trainings regarding product and technical innovations and safe handling.

In order to avoid any risk of misleading the final customer, in particular by confusion of MARES products with the products of other manufacturers, MARES products shall be presented in an exclusive area on the website which is specifically designed for that purpose, as is the case for exclusive areas in stationary points of sale. No other products or brands of other manufacturers shall be presented in this area. If the website has a search function, the dealer

shall ensure that MARES products are not confused with products of other manufacturers and that, to the extent possible, no other products are displayed as a result of targeted searches for MARES products. This is also necessary to reduce safety risks to the final customer which may result from a combination, by the final customer due to lack of advice, of MARES products with products of other manufacturers that may compromise safety.

The dealer shall ensure that the website for the sale of the products and the information provided on the website are in compliance with all relevant legal requirements, in particular with the legislation on electronic commerce and on data protection, and contain all information and instructions as required by the law, in particular by the provisions in relation to distance selling.

The website shall clearly identify the commercial activity of the dealer. The dealer shall grant to the final customer all advantages and rights connected to its commercial activity as required by the law (in particular warranty and right of revocation).

The website shall contain information on the responsible provider in accordance with the electronic commerce provisions. Moreover, the dealer shall indicate his valid VAT identification number at a clearly visible location on the website.

To ensure the implementation of the preceding requirements, MARES products shall only be distributed over the internet on the dealer's own website, which shall correspond to these Guidelines. The distribution over so-called internet marketplaces and other distribution platforms of third parties is only permitted if the mentioned presentation criteria are met. The distribution over internet auction platforms which do not comply with this requirement is not permissible. This also applies if the content of the mentioned websites is integrated in the dealer's website by way of "framing". The distribution and offering of MARES products on internet auction platforms in form of a sale by auction is generally not allowed.

In order to avoid any risk of misleading the final customer with regard to the availability of products and to be able to take into account shortfalls in production, as well as for confidentiality reasons with regard to the launch of new products, the dealer shall not announce, present or promote MARES products until prior confirmation by MARES that these products have actually been produced, are available and can be supplied.

The dealer shall notify the distribution over the internet to the MARES distributor without delay and shall, upon request inform and render account to the MARES distributor of all circumstances relevant to the compliance with these Guidelines, including by provision of copies of the relevant documents.

In the country of internet or stationary distribution, the dealer shall either operate a service centre that has been certified by MARES and a corresponding spare parts depot, or conclude a respective agreement with a certified service centre and corresponding spare parts depot. This agreement shall ensure a proper servicing of the MARES products, to avoid any detriment or risks in connection with the use of the respective MARES products by final customers due to improper servicing. The dealer and the service centre are free to agree on the terms of this agreement. The dealer shall indicate the address of the service centre on the website.

The internet dealer shall inform the MARES distributor in advance before starting any business activities in a country, and shall notify the MARES distributor of the certified service centre, as shall refrain from presenting and distributing MARES products without a certified service centre. In this regard, the dealer acknowledges that MARES records the serial number of its products, in order to ensure that all necessary steps can swiftly be taken in case of technical problems. The dealer shall keep detailed records of all serial numbers and addresses of final customers for use in case of product recalls.

PACKAGING

NATEEVA

The Nateeva fin combines an open heel that has a soft, comfortable fit, with a lightweight and responsive blade. It features multi-fit sizing that's suitable for different feet, including junior sizes.

Strap and adjustment

Among our open-heel snorkeling fins, this is the one that is the easiest and most intuitive to adjust: the strap offers six adjustments for a comfortable and secure hold.

Blade fastening system

The blade and foot pocket features a handy connecting system. In one simple motion, fasten the fins together for easier transport.

TESTED CO₂ BUILD UP

When breathing occurs within a closed volume, it can cause CO₂ (carbon dioxide) build-up. Our Research and Development team studied dozens of prototypes, and conducted countless tests with our ANSTI machine, which allows us to measure the residual amounts of CO₂ at varying breathing intensity and frequency, in order to identify the best technical solutions. Reference regulations are EU Standards EN250 and EN14143, widely used in the Scuba Diving industry.

BRAVE TT & BRAVE TT JR

The Brave TT and Brave Jr. TT masks are ultralight, colorful, and feature an incredibly soft bi-elastomer skirt.

Specifics for the skirt

The skirt on both versions is made of a bi-elastomer with Twintech technology, an exclusive process derived from Mares Liquidskin technology, featuring a stiffer area supporting the lens, with a softer section in contact with the face, for optimal comfort.

Lens

Lens is made of polycarbonate with anti-fog treatment, combining light weight and excellent optical properties. In both the adult and junior versions.

Buckles and head strap

The silicone strap optimizes the seal in a comfortable and secure fashion. The lever buckles make adjustments quick and effective.

RECREATIONAL & RESPONSIBLE

Our Aquazone range of recreational products for the entire family was our first group of products to feature our sustainable packaging initiative.

We introduced the first reusable mesh bags many years ago, and we continue striving to find new solutions with the goal of reducing our environmental impact.

We removed PVC from our packaging, replacing it with bioplastics or R-PET (Recycled PET). Even our meshbags have evolved! Today we produce them using recycled materials, and our packaging has switched from polypropylene to cardboard.

Last but not least, we haven't lost sight of product safety from a raw material standpoint: Our products are made with high quality materials, in compliance with the European REACH regulations, the highest level of protection for human health and the environment.

GREEN 'BIO-PLASTIC' POLYBAGS

The new way to package all Mares fins and snorkels.

NO PVC

Mares is replacing PVC packaging stickers with paper ones.

DURABLE YET SUSTAINABLE

Replacements perform just like standard plastic.

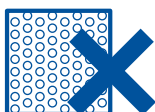

70 YEARS = 70% -

Since Mares hit 70 years in 2019, we have been dedicated to reducing plastic use by 70%.

MARES REDUCES ITS ENVIRONMENTAL FOOTPRINT

by using ethanol extracted from sugar cane instead of crude oil for 'bio-plastic' polybags, which significantly reduces carbon emissions.

SUSTAINABLE SHIPPING

We are also significantly cutting down the use of plastic when shipping packages, with no more plastic air cushions or bubble wrap used as filling material.

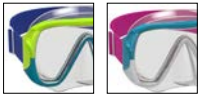

REUSABLE MESH BAGS

Our reusable mesh bags are made from a bio-plastic front panel and a woven R-PET back panel using PET from recycled and transformed plastic bottles. Great for product packaging and reusable for collecting trash while diving.

BUOY BAG

The Buoy Bag is the latest arrival in the Aquazone packaging. The packaging is reusable and serves multiple functions, representing an added value for the end consumer.

The packaging function

The buoy bag guarantees excellent product visibility in the store, with a clear broad front panel. It comes with a header card graphically illustrating the many ways to use it.

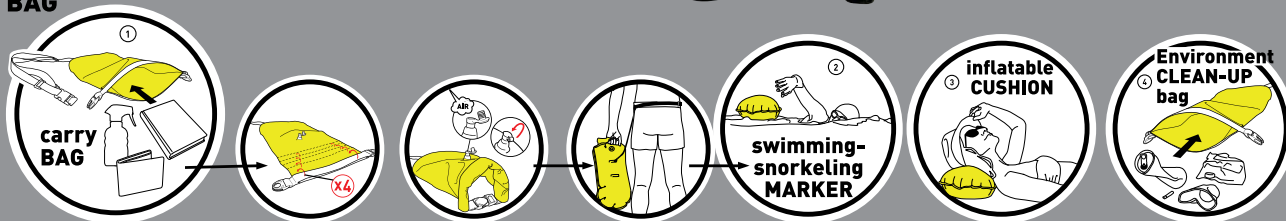

Accessory functions

It can be used for carrying snorkeling equipment, or to stow personal objects on the beach, protecting them from water and sand. The valve lets you blow up the inner air chamber, transforming the sack into a comfortable beach cushion, or into a buoy for swimming and snorkeling in open water. The shoulder strap, with its quick-release buckle, functions as a belt to fasten around your waist when playing in the water. Finally, it can also be used to collect garbage on the beach.

Availability

The Buoy Bag is available with the Wahoo Neon [code 411779] and Pirate Neon [code 411788] combos, in the BB size.

DILLY

Dilly is our most comfortable Kid Combo. It is designed to be easily worn by children from 4 to 7, and not just for snorkeling. It's also a helpful tool in developing and improving their skills in the water.

Specifics for the skirt

The little mask features an incredibly soft elastomer skirt and frame. Adapting to the shapes of the face, creating a watertight seal without uncomfortable pressure or tension.

Lens

The lens, in cellulose propionate, is also incredibly flexible: This is another important element in ensuring a super snug and comfortable fit with complete safety.

Strap

The strap is made of a soft elastic fabric band that is easy for children to adjust thanks to the sliding buckle.

Snorkel

The lightweight curved snorkel and specific mouthpiece prevents jaw fatigue by adapting perfectly to this age range of users. The snorkel can be fastened to the mask with the soft silicone snorkel holder.
