COMPANY PRESENTATION

MARES - OVER SEVEN DECADES OF DIVING EXCELLENCE

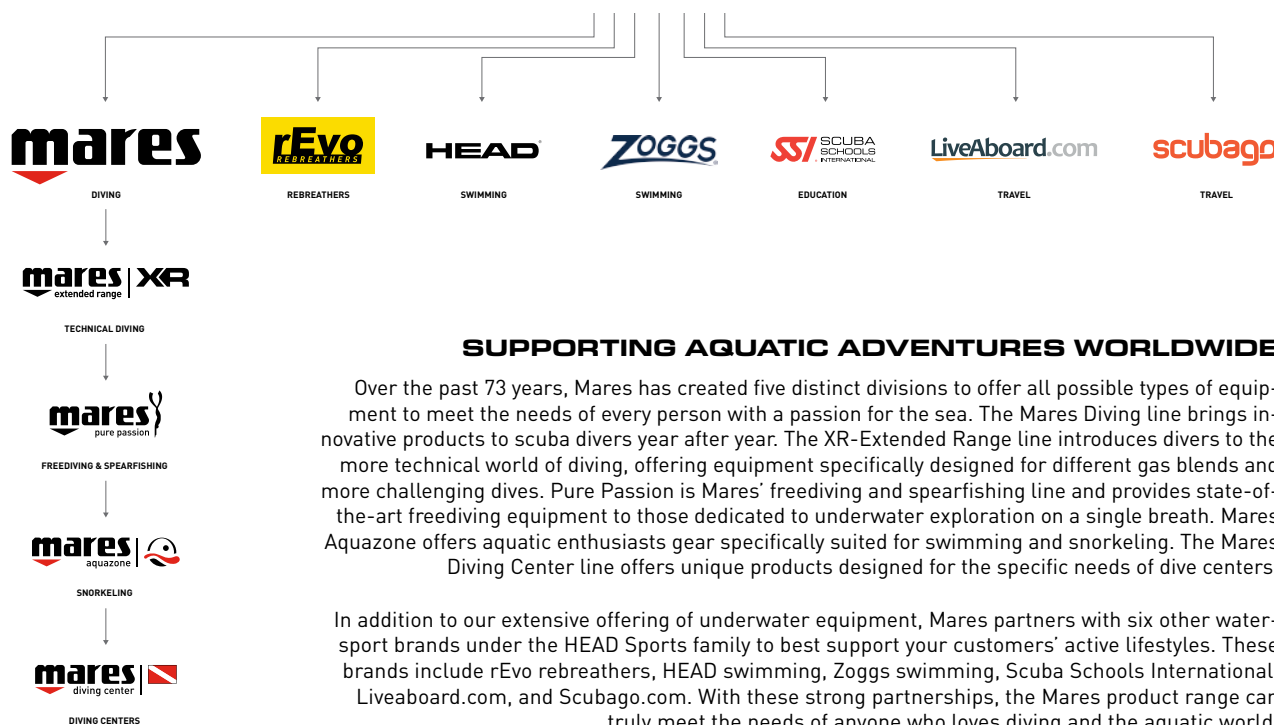

Since 1949 Mares has been a world leader in the manufacturing and global distribution of dive products. A strong athlete and WWI Austrian Royal Navy diver, Ludovico Mares founded Mares through his desire to share his extreme passion for the sea with the rest of the world. From a few spearguns, masks, and fins, Mares grew of humble beginnings into the world's leading dive equipment manufacturer. This passion still drives the spirit of Mares on the relentless quest for innovation, reliability, the best technology, and state-of-the-art performance.

Every year, Mares stays true to its Mission Statement to help every diver:

"ENJOY DIVING WITH ADVANCED PERFORMANCE THROUGH SUPERIOR TECHNOLOGY."

Based in Rapallo, Italy, Mares employees gain daily inspiration from the majestic Mediterranean Sea. The strategic location in this picturesque town on the Italian Riviera allows the Mares product development team quick access to great diving, where they fine-tune every new product to meet the needs of each and every diver. Constant investment in innovation and continuous advanced research makes Mares the leader in safe and reliable underwater equipment manufacturing.

WATERSPORT BRANDS

SUPPORTING AQUATIC ADVENTURES WORLDWIDE

Over the past 73 years, Mares has created five distinct divisions to offer all possible types of equipment to meet the needs of every person with a passion for the sea. The Mares Diving line brings innovative products to scuba divers year after year. The XR-Extended Range line introduces divers to the more technical world of diving, offering equipment specifically designed for different gas blends and more challenging dives. Pure Passion is Mares' freediving and spearfishing line and provides state-of-the-art freediving equipment to those dedicated to underwater exploration on a single breath. Mares Aquazone offers aquatic enthusiasts gear specifically suited for swimming and snorkeling. The Mares Diving Center line offers unique products designed for the specific needs of dive centers.

In addition to our extensive offering of underwater equipment, Mares partners with six other watersport brands under the HEAD Sports family to best support your customers' active lifestyles. These brands include rEvo rebreathers, HEAD swimming, Zoggs swimming, Scuba Schools International, Liveaboard.com, and Scubago.com. With these strong partnerships, the Mares product range can truly meet the needs of anyone who loves diving and the aquatic world.

INTERNET POLICY

POLICY FOR THE DISTRIBUTION OF MARES PRODUCTS OVER THE INTERNET

In recent years, distribution over the internet has increasingly become an additional means of distribution besides traditional stationary trade. In particular, internet distribution offers new possibilities to dealers of MARES to sell to the final customer.

Even though MARES considers stationary sport retailing as an indispensable means of distribution with a view to providing information and advice to the final customer, MARES also welcomes the increasing use of the internet as a parallel channel of distribution, as additional selling opportunities are in the interest both of the manufacturer and of the dealer and increase overall market coverage.

However, MARES as manufacturer is responsible to ensure, together with its dealers, that the specificities of the internet distribution are taken into account as the final customer has no opportunity to inspect the products and to assess their suitability for use in sport. Thus, in light of the potential risks which are connected to the use in sport of the sold products, MARES and its dealers have to ensure that the distribution over the internet does not give rise to any detriment or risk to the final customer and that customer dissatisfaction based on wrong expectations of the product characteristics due to incomplete or wrong information is avoided.

For this reason, MARES has established the following guidelines, which cover the distribution of MARES products over the internet to final customers by all dealers.

For purposes of these guidelines, MARES products are all products distributed by MARES. The dealer commits not to sell MARES products over the internet outside the EU.

The way of presentation of the sold products over the internet shall ensure that all essential characteristics, features and parts of the product are truthfully displayed, and allow the final customer to assess the suitability of the product with a view to his sporting skill, as well as any dangers and risks connected to the envisaged use in sport. With a view to this, the dealer shall implement appropriate technical and design solutions for the presentation of the products, and include for each product a link at a clearly visible location to the respective product description on www.mares.com, to allow the final customer to access further information and technical data on the respective MARES products.

For consumer safety, warranty and product liability reasons and to avoid any possible confusion, dealer shall only advertise and sell new and unused MARES products in their original packaging and with the appropriate user manual enclosed.

With a view to the technical nature of the products, the dealer shall ensure that telephone support is available to final customers in case of distribution over the internet. Support shall be provided by qualified personnel during normal trading hours to a sufficient extent under a local number and the language of the respective country of distribution. The telephone support shall offset, in particular, the missing opportunity for the final customer to assess the product characteristics, and shall ensure that the use of the MARES product will not give rise to any detriment or risk to the final customer due to insufficient advice. The dealer commits to provide the qualified personnel with regular trainings regarding product and technical innovations and safe handling.

In order to avoid any risk of misleading the final customer, in particular by confusion of MARES products with the products of other manufacturers, MARES products shall be presented in an exclusive area on the website which is specifically designed for that purpose, as is the case for exclusive areas in stationary points of sale. No other products or brands of other manufacturers shall be presented in this area. If the website has a search function, the dealer

shall ensure that MARES products are not confused with products of other manufacturers and that, to the extent possible, no other products are displayed as a result of targeted searches for MARES products. This is also necessary to reduce safety risks to the final customer which may result from a combination, by the final customer due to lack of advice, of MARES products with products of other manufacturers that may compromise safety.

The dealer shall ensure that the website for the sale of the products and the information provided on the website are in compliance with all relevant legal requirements, in particular with the legislation on electronic commerce and on data protection, and contain all information and instructions as required by the law, in particular by the provisions in relation to distance selling.

The website shall clearly identify the commercial activity of the dealer. The dealer shall grant to the final customer all advantages and rights connected to its commercial activity as required by the law (in particular warranty and right of revocation).

The website shall contain information on the responsible provider in accordance with the electronic commerce provisions. Moreover, the dealer shall indicate his valid VAT identification number at a clearly visible location on the website.

To ensure the implementation of the preceding requirements, MARES products shall only be distributed over the internet on the dealer's own website, which shall correspond to these Guidelines. The distribution over so-called internet marketplaces and other distribution platforms of third parties is only permitted if the mentioned presentation criteria are met. The distribution over internet auction platforms which do not comply with this requirement is not permissible. This also applies if the content of the mentioned websites is integrated in the dealer's website by way of "framing". The distribution and offering of MARES products on internet auction platforms in form of a sale by auction is generally not allowed.

In order to avoid any risk of misleading the final customer with regard to the availability of products and to be able to take into account shortfalls in production, as well as for confidentiality reasons with regard to the launch of new products, the dealer shall not announce, present or promote MARES products until prior confirmation by MARES that these products have actually been produced, are available and can be supplied.

The dealer shall notify the distribution over the internet to the MARES distributor without delay and shall, upon request inform and render account to the MARES distributor of all circumstances relevant to the compliance with these Guidelines, including by provision of copies of the relevant documents.

In the country of internet or stationary distribution, the dealer shall either operate a service centre that has been certified by MARES and a corresponding spare parts depot, or conclude a respective agreement with a certified service centre and corresponding spare parts depot. This agreement shall ensure a proper servicing of the MARES products, to avoid any detriment or risks in connection with the use of the respective MARES products by final customers due to improper servicing. The dealer and the service centre are free to agree on the terms of this agreement. The dealer shall indicate the address of the service centre on the website.

The internet dealer shall inform the MARES distributor in advance before starting any business activities in a country, and shall notify the MARES distributor of the certified service centre, as shall refrain from presenting and distributing MARES products without a certified service centre. In this regard, the dealer acknowledges that MARES records the serial number of its products, in order to ensure that all necessary steps can swiftly be taken in case of technical problems. The dealer shall keep detailed records of all serial numbers and addresses of final customers for use in case of product recalls.

BECAUSE WE CARE

PROTECTING THE OCEAN WITH ECO-FRIENDLY PACKAGING

Over the past three years, Mares has been on a mission to reduce the use of unnecessary plastic in our packaging in an effort to better care for the planet we call home, because if we don't take care of our oceans, who will?

As divers, respecting the ocean is a fundamental rule, but we feel the call to set a higher standard at Mares. We have adopted concrete measures to reduce unnecessary plastic in our company, from removing most of the outer film coatings on our packaging, to using 100% biodegradable mask boxes. We also encourage our employees, collaborators, and suppliers to do the same. To safeguard what we love most, we must do our part to preserve all bodies of water now and for future generations.

The initial steps have been taken, with non-plastic alternatives gradually being introduced throughout all our lines, hoping in the near future to replace plastic completely. Join us in our quest to protect the blue planet.

MARES S.p.A Contributed toward saving*:

5,495 Kg	Co2 equivalents
2,891 kg	crude oil equivalents
1kg	phosphate equivalents
268,446 MJ	primary energy
9kg	dioxide equivalents

*Eco Certificate 2019 - DerGrünePunkt

SUSTAINABILITY WITHIN THE OFFICE

Mares HQ now uses vending machines with paper cups and wooden spoons. All employees have re-usable water bottles and recycling areas have been placed throughout the office environment.

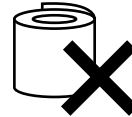

NO PVC

Mares is replacing PVC packaging stickers with paper ones.

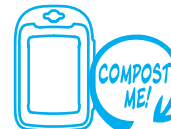

REUSABLE MESH BAGS

Our reusable mesh bags are made from a bio-plastic front panel and a woven R-PET back panel using PET from recycled and transformed plastic bottles. Great for product packaging and reusable for collecting trash while diving.

SAY NO TO FILM COATINGS

Mares has removed most of the outer plastic film coatings on our packaging.

100% ECO-FRIENDLY MASK BOX

Mares mask boxes are now molded from sugar cane pulp. Reusable. Recyclable. 100% biodegradable. Sugar cane pulp is the new cardboard. These new sugar cane fiber-based mask boxes are naturally white, which means no bleaching, and are easier to produce, which lowers water consumption and pollution.

100% BIODEGRADABLE

Mares' sugar cane pulp mask boxes will biodegrade in the soil in just 90 days!

I'm green Plastic GREEN 'BIO-PLASTIC' POLYBAGS

The new way to package all Mares fins and snorkels.

BLUE OCEANS PLASTIC FREE

DURABLE YET SUSTAINABLE

Replacements perform just like standard plastic.

70

70 YEARS = 70% -

Since Mares hit 70 years in 2019, we have been dedicated to reducing plastic use by 70%.

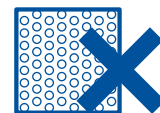

CORN-BASED BAGS

The new, biodegradable, plastic-free option for wetsuit packaging.

SAY GOODBYE TO PLASTIC CLAMSHELL PACKAGING

Mares aims to eliminate all plastic clamshell mask packaging.

SUSTAINABLE SHIPPING

We are also significantly cutting down the use of plastic when shipping packages, with no more plastic air cushions or bubble wrap used as filling material.

CO₂ MARES REDUCES ITS ENVIRONMENTAL FOOTPRINT

by using ethanol extracted from sugar cane instead of crude oil for 'bio-plastic' polybags, which significantly reduces carbon emissions.

Since 2007, Mares - as a company of the HEAD Group - has been partnered with global environmental charity Cool Earth. This partnership has resulted in a worldwide environmental program - the first of its kind for a sporting goods company. The simple idea behind Cool Earth is that rainforests are worth much more left standing than they are cut down for timber or burnt to clear land for cattle ranching. Clearing just one acre of rainforest can emit a staggering 260 tonnes of CO₂. Cool Earth works directly with local communities and NGO's around the world to help them protect their forests and halt the impact of deforestation on climate change.

WE SUPPORT COOL EARTH, SO SHOULD YOU.

Go to coolearth.org and learn more about what you can do to help safeguard the planet's essential ecosystems.

ICONS / GUIDE

• TECHNICAL DIVE CONFIGURATION

The particular design, characteristics and elevated performance of this product mean it can also be used in technical dive configurations.

• DEEP DIVE

Mares' dedication to research and development is at the heart of our company. Our ANSTI test machine can test down to a depth of 200m, twice the depth of most machines used by our competitors, allowing us to test our regulators in conditions which would be unthinkable for others.

• COLD WATER

Designing and engineering products for cold water diving requires maximum attention to performance, safety and technical details. Mares creates equipment specific for cold water and ice diving. Rigorous tests ensure top-notch performance keeping you comfortable, warm and secure. Combining comfort, safety and performance is our mission and the strength of our unique R&D Team.

• LEFT & RIGHT SIDED USE

The innovative design allows you to use the second stage on either the left or right side without having to disassemble the 2nd stage. This design also provides a 2nd stage without a top or bottom. It performs the same in either orientation, making it intuitive and effortless for passing to a buddy. These features, including the technical characteristics, make it very suitable for technical and recreational diving, and for any special operating requirements.

• TRAVEL OPTIMIZED

In today's world of travel, we are strictly confined by weight restrictions and dimensions. Your equipment needs to include certain features to be considered 'travel friendly'. Lightweight, streamlined, easy to pack and hassle-free are just some of the qualities of our 'Travel Optimized' gear.

• GRADIENT FACTOR

Gradient factors were developed by tech divers to render the ZH-L16C algorithm the most advanced decompression tool capable of tackling the most demanding dives. Gradient factors are also a very intuitive and transparent way to customize the algorithm to one's personal needs, making it the most universal and powerful algorithm in existence today.

• AGF - ALTERNATE GRADIENT FACTORS

Alternate Gradient Factors are an additional, less restrictive decompression plan, calculated throughout the dive, that a diver can switch to in case of an emergency. This second decompression calculation can be displayed together with the main gradient factors calculation for an assessment of the situation.

• CEIL-CON

Ceiling-controlled decompression (CEIL-CON) maximizes inert gas washout by leading you through a continuous, controlled ascent in between the standard 3 m / 10 ft decompression steps. This results in shortened decompression times and smoother supersaturation profiles in your tissues. CEIL-CON is a Mares exclusive.

• TRIMIX

The trimix gas management in Genius includes air, nitrox, trimix and heliox. With the possibility of setting up to 5 gases, which the predictive algorithm accounts for in the decompression calculation displayed during the dive, you can optimize your decompression. Oxygen concentration can be set as low as 7% (hypoxic trimix or heliox).

• MULTIGAS

The Multigas feature allows you to perform gas switches during the dive to accelerate your decompression (air and nitrox only). The predictive decompression feature, if activated, ensures that all set gases are accounted for in the decompression calculation, allowing you to take full advantage of the extra tanks that you carry along with you.

• BLUETOOTH

Bluetooth accompanies us in our daily life and it is only natural that this technology trickled down to dive computers. With bluetooth, downloading your logbook to a smart device is as simple as pushing a button, no need for cables, cradles or dongles.

• DIGITAL COMPASS

A compass should always be part of a diver's equipment, even if you don't use it on a regular basis. So having it integrated within your dive computer is the most logical solution. With a digital compass you can set a bearing to navigate to a wreck, swim in blue water towards the beach after a deep canyon dive, and much more. Or simply know that is there, in case you need it.

ICONS / GUIDE

• RECHARGEABLE BATTERY

Mares presented the first dive computer with rechargeable battery in 2010. The technology has made giant strides since then, and Mares has participated in this evolution step by step. The rechargeable battery technology in Genius is reliable, safe and provides worry free energy. In spite of having a very large, permanently lit color display, the battery in Genius lasts for up to 40 1-hour dives on a single charge.

• COLOR DISPLAY

Color displays are so much more than a gimmick when it comes to diving. A dive computer is not only a depth gauge and decompression meter, but also your guardian should a dangerous situation arise. Genius can alert you in clear text, in one of 17 languages, combining the text with color to highlight the situation and how to correct it, so that you should be in no doubt as to what action to take to remedy the situation. Having a smartphone type user interface, including graphic dive logs, is an added bonus.

• COLOR CUSTOMIZATION

Various color kits available: customize your gear with your preferred color in just a few simple steps.

• ULTRASTRETCH

High-end Ultrastretch neoprene delivers the best comfort while diving and during donning and doffing.

• NITROX

All 'Nitrox' version Mares regulators have undergone additional CE testing following norm EN13949:2003. This norm sets out the requirements, tests and labelling for breathing equipment destined for use in open circuit breathing apparatus with compressed Nitrox and Oxygen.

• FREEDIVING

Accessories and equipment especially designed for freedivers to increase safety, improve hydrodynamics and offer greater comfort.

• SPEARFISHING

A full range of accessories and equipment especially designed for spearfishing.

• TECH/COMPETITION

Top-level accessories and equipment for demanding divers, competitors and enthusiasts seeking more technical gear.

• HIGH POWER

A special speargun configuration which provides maximum power and reliability.

• ADVANCED USE

Product designed for advanced use, perfect for snorkelers who need comfort and high performance.

• RECREATIONAL USE

Product ideal for recreational use, for those who go snorkeling occasionally.

• WATER CONFIDENCE

Product especially developed to improve confidence in the water and introduce little ones to the world of snorkeling.

• COLOR & SIZES

The Color & Size identification system allows the user to immediately identify the different sizes of Diving Center and rental equipment by just looking at the color codes.

LANYARD STAINLESS SPIRAL WITH RING

Code: 415732

RRP
€ 28.00

- STAINLESS STEEL SPIRAL CABLE
- PROVIDES EXTENSION MORE THAN 50 CM/20 IN
- QUICK RELEASE BUCKLE
- TO AVOID LOOSE ACCESSORIES

She Dives sizes	1	2	3	3L	3W	4	4L	4W	5			

DETAILS

Versatile pop-out pocket

Thermal Graphene lining

FLEXA

GRAPHENE

What is GRAPHENE material?

It is a thick, strong material which is an excellent heat conductor. From tests, we have found that Graphene has the capacity to raise temperatures by 5° when in contact with heat, in this case from the body.

The Flexa Graphene is the most advanced Mares semidry suit, with an innovative Graphene coating that helps to increase body temperature by retaining body heat. S-seal technology ensures additional thermal comfort.

The suit features a soft, flexible, waterproof Masterseal zip on the back, and further zips at the ankles.

Ultrastretch neoprene means easy donning and doffing. A comfortable, new 'pop out' pocket has been placed on the right thigh, and a hood is included with Glideskin material for a better seal.

The Flexa Graphene is not just a semidry suit, it is a revolutionary concept. It helps the diver stay warmer for longer, providing a perfect fit, with a unique Mares design!

ICE SKIN

Code: 412102 Man
Code: 412103 She Dives

NEOPRENE TYPES

GLIDE SKIN

An outer coating applied over a closed-cell neoprene rubber sheets.

It enhances gliding and prevents water absorption if used on the outer side, while it helps position stability and seal closure if used internally.

- GLIDE COATING
- SELECTED NEOPRENE FOAM
- NYLON/POLYESTER

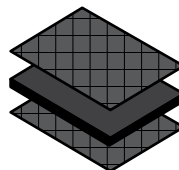

GLIDING

DOUBLE FACE (DF) Standard Neoprene

An outer/inner lamination with nylon and polyester series fabric applied over a closed-cell neoprene rubber.

It provides the suits with a smooth feel, colorful and durable. All fabrics are chemical resistant, elastic and low moisture contents (4,5%), suitable for all water sports products.

- NYLON/POLYESTER
- SELECTED NEOPRENE FOAM
- NYLON/POLYESTER

ENDURANCE

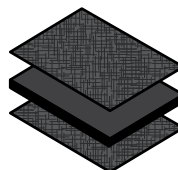

COLORFUL

DOUBLE FACE FLEX (DFF) Ultrastretch

An outer/inner lamination with super stretch nylon and polyester series fabric applied over a closed-cell neoprene rubber.

It provides the suits with a soft smooth feel, high elastic, colorful, durable and regains products desired shape.

All fabrics help to increase free movement, leading to high performance on products.

- STRETCH NYLON/POLYESTER
- SELECTED NEOPRENE FOAM
- STRETCH NYLON/POLYESTER

ULTRA SKIN

WHAT IS ULTRA SKIN ABOUT?

The Mares Ultra Skin Line is a complete range of apparel designed for any sporting adventure: whether you are diving or doing other watersports, the Ultra Skin is the right choice.

Designed as a stand-alone piece, it is also suitable under a wetsuit or a dry suit. Ultra Skin technology combines three layers of fabric studied to deliver the best performance, thermal comfort and with neutral buoyancy.

When worn as a standalone, the Mares Ultra Skin provides 50+ UPF protection from the sun's harmful rays.

Every style comes equipped with thumb loops and stirrups to prevent it riding up when being worn as an undergarment. A full range of sizes and varieties are available, including accessories.

LED BATTERY CHARGE INDICATOR
RECHARGEABLE BATTERY
ZOOMABLE LIGHT BEAM

- XHP50 LED
- SINGLE LED WITH LENS
- MAGNETIC ADJUSTABLE FOCUS - FROM NARROW TO WIDE LIGHT BEAM
- VISUAL BATTERY CHARGE INDICATOR
- 135 MINUTES OF BURN TIME (MAX POWER)
- IN-HOUSE RECHARGEABLE BATTERY
- USB CHARGING CABLE
- VISUAL LED CHARGE INDICATOR
- WIDE LIGHT BEAM
- MULTIFUNCTIONAL MECHANICAL SWITCH
- AN "ELECTRONIC LOCK" SYSTEM PREVENTS THE TORCH FROM BEING ACCIDENTALLY SWITCHED ON - DOUBLE CLICK THE SWITCH TO TURN ON THE TORCH
- FOUR OPTIONS: ON, LOW, FLASH, OFF
- ONE-HAND USE
- TUBULAR HANDLE
- ADJUSTABLE WRIST STRAP
- PADDED CASE WITH ZIP

**TECHNICAL FEATURES**

Bulb	1* XHP50 LED Chip		
Switch Mode	High	Low	Flash/SOS
Led lumens [25°]	3200	930	/
Burn time (min)	135	265	145
Color Temperature	5700-7800		
Light beam (1m distance)	Hot Spot (12°)	Corona (75°)	
(mm/in)	300mm / 11.8in	1350mm / 53in	
Rechargeable Batteries	1 x ICR26800		
Time to charge	7h (5V1A adapter) - 14h (PC 500mA)		
Total length	225mm / 8.8in		
Head diameter	62mm / 2.4in		
Body diameter	34mm / 1.3in		
Weight with batteries	605g / 21oz		
Max. operation depth	120m / 393ft

Head diameter	62mm / 2.4in		
Body diameter	34mm / 1.3in		
Weight with batteries	594g / 20.7oz		
Max. operation depth	120m / 393ft		

EOS LRZ

We have decided it is time to see things more clearly!

The new line of EOS LRZ torches is a true, new offering in the landscape of torches; featuring characteristics that are unique to the market, at competitive prices.

Beyond the option of adjusting the beam of light to meet your needs and diving conditions; the new EOS LRZs now uses a mechanical, multifunction switch, with a battery charge indicator. It is extremely useful to always know the power level of your battery, especially during the dive!

Safe and user-friendly, the switch is waterproof and with a simple touch it commands the torch in four different ways: maximum power on the first press, about 40% power on the second press, a flashing strobe on the third and lastly 'off' on the fourth.

The battery can be charged anywhere using a USB cable connected to a computer or adapter. The new battery charger, boasts a power level indicator, intuitively showing when charging is complete.

Its ease of use is guaranteed by the tubular grip, making it possible to manage the torch with one hand. Included is an adjustable strap ensuring a more secure grip.

Durable and wear-resistant, EOS LRZ torches are made of anodized aluminum and have a new EOS Family Look.

Finally... EOS LRZ torches stand apart from the crowd due to the innovative temperature control system, allowing for use out of the water.

All Eos versions are fitted with a padded, zippered case, made of exceptionally durable and long-lasting material for increased protection.

No disposable packaging as part of our green initiatives.

"Electronic" Switch Lock System prevents from accidental switch-on

Multifunction Switch with different options of use: High 100%, Low 40% and FLASH.

Visual Battery Indicator: have always under control the charge of the battery

Built-in Rechargeable USB System

LED charge indicator: helps to easily understand when the battery is charged

RAFTING & CANYONING CENTER

mares | 
diving center

DIVING CENTER LINE

Years of research and development combined with experience and feedback from our Diving Centers around the world, have all contributed to the creation of the Mares Diving Center project. A line of products and services designed specifically for the most demanding Diving Centers around the world. Mares' guarantee and experience delivers the high quality standards required by every Diving Center.

ROVER LINE

The diving center market is an extremely important part of the diving business. Mares supports this market with a dedicated product line. Careful attention was paid to the durability, functionality and comfort of the Rover line. It is a dedicated product line, including regulators, bc-vests, wetsuits and masks developed to meet the special needs of DC customers.

COLOR & SIZE

Mares found a solution to help you in your daily business; by introducing a new quick and easy Color & Size identification system on many products. This system will allow you and your staff to immediately identify the different sizes in your Diving Center and rental equipment just by looking at the color codes.

Color & Size

DIVING CENTER / WETSUIT LINE

- PERFECT FIT AND FREEDOM OF MOVEMENT
